Education

Indraprastha Institute of Information Technology, Delhi (IIIT-D) **CGPA: 7.57**
B.Tech in Computer Science and Artificial Intelligence (CSAI) till 3rd Semester
Aug 2024 – Present

KRD International School, Issapur, Delhi Percentage: **91%**
CBSE Class XII
Apr 2022 – Apr 2023

R.P.S. Public School, Rewari, Haryana Percentage: **97%**
CBSE Class X
Apr 2020 – Apr 2021

Work Experience

1. Co-Founder | M2 HealthTech Private Limited Apr 2026 – Present
- Spearheaded product strategy and full-stack development for 2+ healthcare applications within the first 4 weeks, coordinating a cross-functional team of 8+ engineers and designers from concept to deployment.

2. Research Intern | SBI Lab, IIIT-Delhi Apr 2026 – Present
Supervisor: Prof. Anubha Gupta
- Researched machine learning and signal processing models for biomedical imaging at IIIT-Delhi's Signal and Bio-medical Imaging Lab.
- Implemented and benchmarked 3+ deep learning architectures for medical image classification, achieving 88%+ accuracy on validation datasets.

3. Open Source Contributor | GitHub Jan 2026 – Present
- Submitted 5+ pull requests across 4 months to open source repositories in full-stack web development and machine learning, improving codebase reliability for 1,000+ downstream users.

Technical Skills

Expertise Areas	Data Structures and Algorithms, Machine Learning, Full-Stack Web Development, Signal Processing, Object-Oriented Programming, Human-Computer Interaction.
Languages	C, C++, Python, Java, JavaScript, TypeScript, SQL, LaTeX.
Frameworks	React.js, FastAPI, Scikit-learn, NumPy, Pandas, OpenCV, Tailwind CSS, Vite, FPDF.
Databases and Cloud	PostgreSQL, MySQL, Supabase, Firebase, Docker, Railway, Google Cloud APIs.
Tools	Git, GitHub, Figma, Mapbox GL JS, VS Code, IntelliJ IDEA, Jupyter Notebook, Google Colab, Matplotlib.
Coursework	Database Management Systems, Statistical Machine Learning, Algorithm Design and Analysis, Operating Systems, Computer Networks, Digital Circuits, Probability and Statistics, System and Signals.

Projects

1. Drishyam AI | React, TypeScript, Python, FastAPI, Supabase, OpenCV, Docker, Railway Feb 2026 – Present
GitHub | Dashboard | Team Size: 2
- Architected a real-time multimodal scam detection system in 8 weeks that processes 3+ input types (calls, messages, media) and extracts structured fraud signals such as UPI IDs and phone clusters via an NLP pipeline with a honeypot AI agent.
- Shipped a production-grade forensic REST API in 6 weeks for synthetic media detection across 4 modalities (image, audio, video, documents) using rule-based forensics (ELA, clone detection, spectral analysis) combined with Transformer deep learning models.
- Deployed the full system as 5+ containerized microservices on Docker and Railway within 2 weeks, integrating deepfake identification via temporal consistency and lip-sync mismatch analysis.

2. Society Prabandh | React.js, TypeScript, Supabase, PostgreSQL, Tailwind CSS Jan 2026 – Mar 2026
GitHub | Team Size: 2

- Launched a full-stack multi-role society management platform (admin, landlord, tenant, security) within 8 weeks, backed by a normalized PostgreSQL schema with row-level security and QR/OTP visitor verification for 100+ resident units.
- Automated billing cycles, payment reminders, and complaint tracking with real-time financial analytics dashboards, reducing manual administrative overhead by 50% within the first month of deployment.

3. MedXPert | Python, Ollama (Qwen-7B), MongoDB Atlas, Google Cloud Speech, FPDF — Jan 2025 – Apr 2025

Guide: Dr. Jainendra Shukla | Team Size: 5

- Delivered an LLM-powered (Qwen-7B) medical symptom screening chatbot in 12 weeks supporting 3+ languages via Google Cloud Speech APIs with automated clinical PDF report generation through FPDF.
- Secured patient records with MongoDB client-side field-level encryption and cut manual screening time by 40% across 2 high-load clinical environments within 4 weeks of pilot.

4. Farm2Table | React.js, Vite, JavaScript, Firebase — May 2024 – Dec 2024

Guide: Pragma Kar | GitHub | Team Size: 6

- Constructed a full-stack agricultural marketplace over 7 months with product listings, order management, and real-time Firebase database sync, connecting 50+ farmers directly with consumers to eliminate intermediaries and raise price transparency.
- Designed an accessible UI/UX for low-tech rural users across 4 sprints, cutting onboarding friction by 35% and improving adoption for first-time digital marketplace participants.

Positions of Responsibility

- **Sponsorship Lead**, E-Summit'26, IIIT-Delhi — Dec 2025 – Present
- **Operations Lead**, OpenHouse'25, IIIT-Delhi — Mar 2025 – May 2025
- **Day Scholar Committee**, Student Council, IIIT-Delhi — Nov 2024 – Aug 2025
- **Batch Representative**, Student Senate, IIIT-Delhi — Sep 2024 – Aug 2025

Awards and Achievements

- **Top 10** of 26,000+ teams - *India Innovates 2026* by MCD, Delhi
- **Top 1,500** of 1,25,000+ students nationally - *The Big Code* by Google
- **Finalist**, Top 20 teams - *Hack4Impact* by IIIT-Delhi and *HackBio* by IIT-Mandi

Interests and Hobbies

Chess | Team and Project Management | Video Editing | Listening to Music | Leadership
